Thurs., 8 2nd Marking Period Ends
Wed., 14 College Night – MS Media Center 6 pm
Tues., 20 Board Meeting – MS Media Center

Brain Teaser

Opaque Marble Balls

Science brain teasers require understanding of the physical or biological world and the laws that govern it.

Lost in the woods, you come upon a mysterious stranger who hands you two large spheres made of two kinds of opaque marble. The spheres look the same, are the same size and have the same weight and apparent density; however, one is solid and the other hollow. The hollow sphere contains a tiny map that will enable you to navigate your way home. Unfortunately, you cannot break the spheres. The stranger agrees to open the sphere that contains the map only if you can determine which sphere is hollow. How do you determine which sphere is hollow?

Bring your answer to the office on a piece of paper with your name on it by Thursday at 3 p.m.

Hint: you don't smash the spheres together or weigh them. No correct answers so far!

Quote of the Day

How committed are you? There is a remarkable difference between a commitment of 99% and 100%.

Vic Conant
